B. 2G4B-27245, 11 Jun 58

1. The drafting of the redocumentation of Project DTLIVEN at Headquarters is planned for June 1958. The presently valid Project Outline was transmitted to the Field by Reference A.

2. We believe that the submission of a completely new Field project outline is not indicated and that revisions, wherever pertinent, are sufficient.

3. It appears that the following paragraphs of the project outline are in need of a revision:

a. Paragraph 5d: The emphasis on administrative harassment should be revised in view of the operational developments and events in 1958.

b. Paragraph 5a(4) should be omitted. Another sub-paragraph to paragraph 5 should be added listing the activities and role of CAJWACKY. (Previous activities of CAJWACKY should also be summarized in paragraph 5d of Reference A).

c. Paragraph 5a and b should be revised to include a realistic assessment of key personnel's knowledgeability since we have to assume that they are aware of KUBIK sponsorship, even if not officially so informed.

d. Paragraph 5a should also be enlarged to include a statement concerning funding cover.

e. Paragraph 7a(1) should be omitted and paragraph 7a(3) should be revised to include other projects with which DTLIVEN has liaison or for which DTLIVEN distributes material.

f. Paragraph 7c needs revision. In particular the new "Commission" should be mentioned.

g. Paragraph 11b should be revised in view of the commitments made in Neumann's and CAJWACKY's written contracts.

h. Paragraphs 11 c and d should be brought up to date.

i. Paragraphs 11f and j need revision. Here also the creation and functions of the "Commission" should be discussed.

- j. In addition to the above suggested substantive revisions, the figures concerning personnel strength, level of operational activities, etc. should be brought up to date or more general language substituted (e.g., see paragraphs 34 and 50.)
- k. Paragraph 8 of the KVTUBZ Annex should mention the possibility of separating co-workers and visitors with a high KVTUBZ and CART potential from OVLINER for independent and direct exploitation by IVBARK.
- l. We would appreciate an early reply.
